

Letter of intent regarding the potential engagement of Scott Milton

Dear Sir or Madam,

I hereby confirm my interest in engaging Scott Milton as a freelance Product Design Director & Consultant, subject to his obtaining the appropriate freelance visa / work authorization in Germany.

I have been in discussion with Scott regarding freelance support across product design, UX/UI, website design, product flows, and design systems. His background in product design leadership, digital product strategy, and brand-led product experiences makes him well suited to the work we have discussed.

The anticipated scope may include:

1. Product design and UX/UI support across product flows and digital experiences.
2. Website and marketing page design.
3. Design system development and interface quality.
4. Product strategy, prototyping, and collaboration with product and engineering teams.

The engagement would be freelance, project-based, and dependent on project needs, availability, and Scott obtaining the appropriate freelance authorization in Germany. Based on our discussions, I anticipate a part-time, flexible allocation of up to around 50% capacity for defined project periods, at an indicative rate of around €125 per hour. Commercial terms would be agreed separately.

This letter confirms my interest in exploring a freelance collaboration and does not constitute a binding employment contract or guaranteed commission.

Kind regards,

Guilherme Maueler
